Altuity Solutions
software for the built environment

Managing your assets and tracking compliance and contract information in the built environment (workplaces, education premises etc.) is critical to safe and efficient operations.

Altuity's asset and maintenance management software - AltoSites™ - provides the big picture on your assets. It's easy for you to know what you're responsible for; where it's located; prioritise resources and take timely and appropriate action.

Business Needs

Limited budgets; resource constraints and concerns over software complexity have restricted access to asset management solutions – until now.

We offer you:

- Variable term subscription licenses
- Modular licensing (invest to the level you need)
- Licensing by site or user

Altuity™ takes the strain from your resources by looking after AltoSites for you in the cloud.

Leaving your colleagues to focus on other priorities and you free to concentrate on your business.

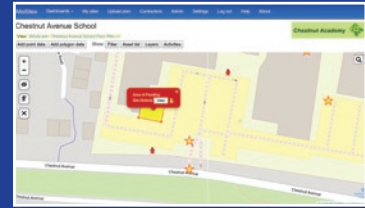

Bringing simplicity
to asset management

Product Features and Benefits

Visualise your assets in a locational context overlaid on maps, site and floor plans without the need for specialist GIS or CAD software.

Enhanced visualisation of data leads to better decision making; intuitive understanding of data context; easier identification of gaps in data and support for comprehensive analysis.

Flexible user definable data schema.

Defining your data types and their attributes enables you to meet your current and future needs quickly and efficiently.

Built in dashboards, analytics and reports which you can export to PDF and spreadsheets.

Easy and highly visual reporting enables you to monitor and report effectively. Exporting data facilitates external analysis and makes it accessible to others.

Alerts and triggers pro-actively notify you and your team of user-definable events of interest. These can be for physical and intangible assets.

Reduce the workload and risk of missed renewals for contracts, insurances and leases. Notifications ensure important data events such as urgent faults or any data affecting a specific site location do not go unnoticed.

User definable search criteria.

Provides flexibility to find the information you're seeking quickly and efficiently saving costs

User specified icons.

Identify 'at a glance', information on the map or plan, how you wish to see it. Intuitive visualisation helps you find data quickly. For example, differentiate critical assets such as gas valves or fire hydrants.

User security from logon to data access rights.

A secure logon and access rights maintain data confidentiality.

On site and on the go access supporting mobile working.

Access your data when and where you need to.

Schedule routine maintenance and compliance inspections e.g. for fire, water, electrical and Health and Safety purposes.

Ensure inspections are performed when due improving statutory and legal compliance requirements.

Date	Location	Status
11/12/2016	1483 Site wide 11 month inspection	Completed

Integrated to RFIID tagging for above and below ground assets.

RFID tags enable you to query information from AltoSites about a specific asset. When used for underground assets readers help you get to the right location quickly and efficiently saving time and reducing the risk of injury or damage.

Simple user interface.

Quick and easy to use reducing learning time and saving costs.

Commercial Features and Benefits

Cloud based.	Saves internal IT costs and resources and provides easy scalability if your data needs grow.
Managed Service.	Altuity manages AltoSites for you enabling you to remain focused on your business.
Subscription License (pay as you go).	Flexible subscriptions are available; which are renewable as required without extended tie ins.
Modular Pricing.	Only license the functionality you need - improving control of your budgets and enabling you to link expenditure to derived benefits. If your needs grow you can choose to license additional modules.
Rapid go live.	Short implementation projects save costs and enable you to utilise the benefits of AltoSites quickly.
Supported, maintained and enhanced for the long term.	We're committed to the support and maintenance of AltoSites. Our value-based innovation will continue to deliver enhancements enabling you to benefit now and into the future.
